Scrum Report Form. CSCE 315 Programming Studio

**Project management status**
1. We are on track to finish our main goals for sprint 2
2. The trello board has been updated with tasks so all group members can check to see what they need to do
3. The teams that we split up into are constantly meeting and working together to complete tasks on time

**Minutes from previous meeting**
Summarize minutes from the previous meeting (NOT this current meeting). Please be thorough, a bullet list of 2-3 single-liners is not sufficient.

In the previous meeting, we observed the burn down charts to make sure that we are still on track. We went through all of the tasks in the backlog and figured out what we could accomplish in between meetings. We assigned tasks from the backlog to each of the team members to work on individually, while also having separate tasks for pairs. After setting goals for the upcoming mini-sprint, we scheduled our next SCRUM meeting.
