SCRUM REPORT and MEETING AGENDA

Report #: 4   Project Name: _____Coffee Connect_____

Date:__4/13/2021____   Prepared by: _____Nicholas Soliman_____

Attendees for the meeting
1. Nicholas Soliman
2. Gian Lezotte
3. Joanna Zhou
4. Pierre Vu

Agenda for the meeting
5. Discuss what we have accomplished
6. Analyze burn down chart and see if we are ahead or behind
7. Figure out roles for upcoming tasks

Overall accomplishments since last meeting
1. We set up the SQL database on Heroku
2. We created the friends feed page and made other small adjustments to the website
3. Created the profile page
4. We were able to get login page on the website to work with the SQL database

Tasks completed by each team member since last meeting

Task description	Assigned to	Completed?
Setup SQL database on heroku	Pierre	yes
Connected database to our specific project	Pierre	yes
Created the friends feed page and other small changes to website	Nicholas	yes
Created the profile page	Joanna	yes
Get login page on website to work with SQL database	Gian	no

Plans for next period
1. We hope to have the login page fully functional
2. We plan to learn nodeJS and integrate it into our website
3. We plan to integrate APIs into the coffee shop information page
4. We plan to learn how to integrate APIs

Task assignment per team member (to be completed before the next meeting)

Task description	Assigned to
Get login page to work	Gian
Do some research nodeJS	Pierre
Integrate API's into the coffee shop information page	Joanna/Nick
Research how to integrate APIs	Joanna/Nick

Project management status

1. The team is completing all individual tasks
2. There is constant/open communication between team members for maximum efficiency
3. All the documentation is being handled by the project manager so the team can focus on creating the product

Minutes from previous meeting

Summarize minutes from the previous meeting (NOT this current meeting). Please be thorough, a bullet list of 2-3 single-liners is not sufficient.

In the previous meeting we discussed plans for combining all of our individual web pages into a whole website. Then we started taking steps into fully integrating APIs and an SQL database. To do this we split up the group into two separate teams: Joanna/Nick working on API integration and Gian/Pierre working on SQI integration. We set goals for each of the two groups across the whole of sprint 2 along with smaller goals until our next SCRUM meeting.
